Education

The Oxford College of Engineering
August 2018 – July 2022
BE student with an emphasis in
Automobile Engineering,
completed a project on biodiesel's
emission properties, and
graduated in first class

Objective

I am a fresher looking for software engineering or any other role related to software development, a software enthusiast who is eager to learn new technologies related to IT, primarily focused on development, but also interested in web development. I am currently learning Spring Boot for back-end implementation, as well as Angular for front-end implementation.

Projects:

File Management Software (Locked Me)

Files in a computer are dealt with in the project. It allows us to create a file, delete a file, and search a file. The Software was written in Core Java, using the OOPs properties and few Data Structures and Algorithms
